Fuel Fill Cap Binds and Possible MIL Comes On With DTC P1456 (Supersedes 04-002, dated January 30, 2004)

SYMPTOM

The fuel fill cap is binding and, if not tightened fully, may cause the MIL to come on and DTC P1456 (EVAP control system leakage, fuel tank system) to set.

PROBABLE CAUSE

The threads in the fuel fill pipe bind on the fuel fill cap.

VEHICLES AFFECTED

CR-V (2WD):

2002 – ALL

2003

Japan-built – ALL (VIN begins with JHL)

England-built – From VIN SHSRD6...3U100001
thru
SHSRD6...3U100161

2004 – From VIN JHLRD6...4C000001 thru
JHLRD6...4C018521

CR-V (4WD):

2002 – ALL

2003

Japan-built – ALL (VIN begins with JHL)

England-built – From VIN SHSRD7...3U100001
thru
SHSRD7...3U100610

2004 – From VIN JHLRD7...4C000001 thru
JHLRD7...4C048557

S2000:

2002 – ALL

2003 – From VIN JHMAP1...3T000001 thru
JHMAP1...3T007688

2002–03 Insight: ALL

2004 Insight: From VIN JHMZE1...4T000001 thru
JHMZE1...4T000003

CORRECTIVE ACTION

Replace the fuel fill pipe, and do an EVAP system function test with the HDS.

H/C 6887210

Defect Code: 03214

Symptom Code: 03203

Skill Level: Repair Technician

Out of warranty: Any repair performed after warranty expiration may be eligible for goodwill consideration by the District Parts and Service Manager or your Zone Office. You must request consideration, and get a decision, before starting work.

DIAGNOSIS

Remove the fuel fill cap, reinsert it, then tighten it. The cap should turn, without resistance, until its O-ring touches the fuel fill pipe.

- If the cap turns freely, this service bulletin does not apply; continue with normal troubleshooting.
- If the cap binds or drags, go to **REPAIR PROCEDURE**.

REPAIR PROCEDURE A - CR-V

NOTE: Make sure the fuel tank is less than half full before starting this procedure.

1. Raise the vehicle on a lift, and remove the left rear wheel.
2. Remove the three EVAP canister mounting bolts. Let the canister hang in place.
3. Support the rear suspension cross beam with a powertrain lift or commercially available jack as shown.

4. Disconnect the fuel fill pipe hoses from the fuel fill pipe.

FUEL FILL PIPE
BRACKET BOLTS

Disconnect the
fuel fill pipe hoses.

5. Remove the two lower rear cross beam bolts, the two fuel fill pipe bracket bolts, and the fuel fill pipe gasket.

Remove the cross
beam bolts.

FUEL FILL PIPE
GASKET

6. Using a pry bar, move the rear cross beam down to make room to remove the fuel fill pipe.

PRY BAR

7. Install the new fuel fill pipe, the fuel fill pipe gasket, and the hoses. Torque the two cross beam bolts to 69 N·m (51 lb-ft). Reinstall the EVAP canister and the wheel.
8. Connect the HDS to the vehicle's DLC (data link connector), and do the EVAP function test:
 - From the HDS main menu, select **Honda System**.
 - From the Honda System menu, select **PGM-FI**.
 - From the PGM-FI menu, select **Inspection**.
 - From the Inspection menu, select **EVAP Test**.
 - From the EVAP Test menu, select **Function Test**.
 - Follow the instructions on the screen.
9. Check the results of the EVAP function test.
 - If the vehicle passed the test, return it to the customer.
 - If the vehicle failed the test, do the DTC P1456 troubleshooting in section 11 of the appropriate CR-V service manual.

REPAIR PROCEDURE B - S2000

NOTE: Make sure the fuel tank is less than half full before starting this procedure.

1. Remove the left side trunk lining.

2. Slide up the fuel fill pipe cover, and disconnect the fuel fill pipe hoses.

3. Remove the fuel fill pipe attachment nuts.

Remove these nuts.

4. Install the new fuel fill pipe with the original nuts.
5. Install the fuel fill pipe hoses with the original clamps. Make sure the fuel fill pipe cover is seated properly. Install the trunk lining.
6. Connect the HDS to the vehicle's DLC (data link connector), and do an EVAP function test:
 - From the HDS main menu, select **Honda System**.
 - From the Honda System menu, select **PGM-FI**.
 - From the PGM-FI menu, select **Inspection**.
 - From the Inspection menu, select **EVAP Test**.
 - From the EVAP Test menu, select **Function Test**.
7. Check the results of the EVAP function test.
 - If the vehicle passed the test, return it to the customer.
 - If the vehicle failed the test, do the DTC P1456 troubleshooting in section 11 of the 2002–04 S2000 Service Manual.

REPAIR PRODECURE C - INSIGHT

1. Remove the trunk lining and the cargo box. (See page 20-44 of the 2000–04 Insight Service Manual.)
2. Remove the right trunk side bulkhead and the right side trunk shelf support.

TRUNK SHELF SUPPORT

BULKHEAD

3. Remove the middle floor pan. (See page 20-92 of the 2000–04 Insight Service Manual.)

4. Remove the battery inner duct and the fuel fill pipe grommet.

5. Slide the fuel fill pipe grommet upward. Then disconnect the fuel fill pipe hoses.
6. Remove the fuel fill pipe bracket bolt and the three fuel fill pipe flange nuts.

7. Install the new fuel fill pipe with the original nuts and bolt.
8. Install the fuel fill pipe hoses with the original clamps. Install the fuel fill pipe grommet.
9. Reinstall all removed parts.
10. Connect the HDS to the vehicle's DLC (data link connector), and do the EVAP function test:
- From the HDS main menu, select **Honda System**.
 - From the Honda System menu, select **PGM-FI**.
 - From the PGM-FI menu, select **Inspection**.
 - From the Inspection menu, select **EVAP Test**.
 - From the EVAP Test menu, select **Function Test**.
 - Follow the instructions on the screen.
11. Check the results of the EVAP function test.
- If the vehicle passed the test, return it to the customer.
 - If the vehicle failed the test, do the DTC P1456 troubleshooting in section 11 of the 2000-04 Insight Service Manual.
